

Caicos

Client
Caicos

Industry
HoReCa

Location
USA

GOAL OF THE PROJECT

Support a new business that supplies equipment and software for restaurants that want to engage guests that are waiting for a table. Our client needed a nice-looking and user-friendly solution for its restaurant customers.

SOLUTION & RESULTS

We created a web interface for the whole system and a web site for selling the Caicos solution.

The interface has a dashboard for the restaurant administrator with information about table wait times, a list of visitors that are waiting for a table and an admin page to configure unique settings for each restaurant.

CORE TECHNOLOGIES

jQuery, Bootstrap, HTML5
