

GoBooking

Hotel Booking Portal for Large Business Travel Agency

Client
VanillaTours

Industry
Travel

Location
Turkey

GOAL OF THE PROJECT

Client wanted to have their own convenient portal for hotel booking with B2B and B2C client support. An ability to use different payment methods for bookings was also one of the requests.

SOLUTION & RESULTS

We developed a user-friendly web application with easy access to the desired information and a convenient administration system with smart notifications.

Having their own resource for hotel booking, VanillaTours increased the number of its partners by giving them special advantages over other businesses.

VanillaTours employees got a reliable system with on-time notifications and automation of routine operations.

CORE TECHNOLOGIES

.NET MVC, MS SQL Server, WCF, Entity Framework, Knockout
