Livepay
The Only Payment Solution You'll Ever Need

Client
Livepay

Industry
Finance, Retail & E-Commerce

Location
Australia

GOAL OF THE PROJECT

LivePay is the global payment solution built for online merchants and marketplaces. We developed a crossplatform mobile UX for it.
Our main challenge was to display all web functionally in a mobile app, create a user friendly interface and maintain high security standards.

SOLUTION & RESULTS

A solution was developed using Xamarin.Forms, as it was intended to be cross-platform (Android, iOS). We solved some obstacles related to technology limitations and satisfied all the client's requirements.

CORE TECHNOLOGIES

Xamarin iOS Native, Xamarin Android Native
