

A SaaS-based platform for buyers and sellers of mortgage loans and other credit instruments

Client
Under NDA

Industry
Finance

Location
USA

GOAL OF THE PROJECT

The main objective was to design and build an end-to-end deal and loan management system allowing users to better manage, analyze and execute on their loan investments.

The business goal was to let the clients benefit from significant cost savings and increased profits by using this platform.

SOLUTION & RESULTS

We developed a highly secure, cloud-based software system which can be easily accessed by anyone that has access to a computer and a web browser. The main functional modules of this system are Pricing, Due Diligence, Asset/Portfolio Management and Servicing Oversight.

CORE TECHNOLOGIES

.NET MVC, Azure Cloud Services, Microservices Architecture, Azure Functions, Azure SQL, Azure Storage, Azure Service Bus
