GOAL OF THE PROJECT

The goal of this project was to build a mobile application in order to maximize savings across all the leading brands and partners.

SOLUTION & RESULTS

We developed a mobile app (for iOS and Android) using Xamarin.Forms. It's a quoting tool that provides an effective and professional method of booking appointments, building quotes and communicating with customers. The app helps homeowners purchase any leading brand of boiler or other home improvement, and have it installed by trusted and accredited local installers, at competitive prices.

CORE TECHNOLOGIES

Xamarin Forms, Prism, SQLite, Custom Maps, Telerik, 3rd party API
